Calum

Lucy

Andrew

Zoe

Reece

**Calum was coming out of school at the end of the day.
He was going to go around the Land of Life Learning
for a nosy about what others were learning about.**

Calum started walking to the Cadets Base, where he met Reece. Reece had a stressful day with a teacher who always said "Put your hand down" and never let anybody say anything. Cadets was an escape for Reece and a place to let off steam. Calum wished Reece good luck and set on his tracks.

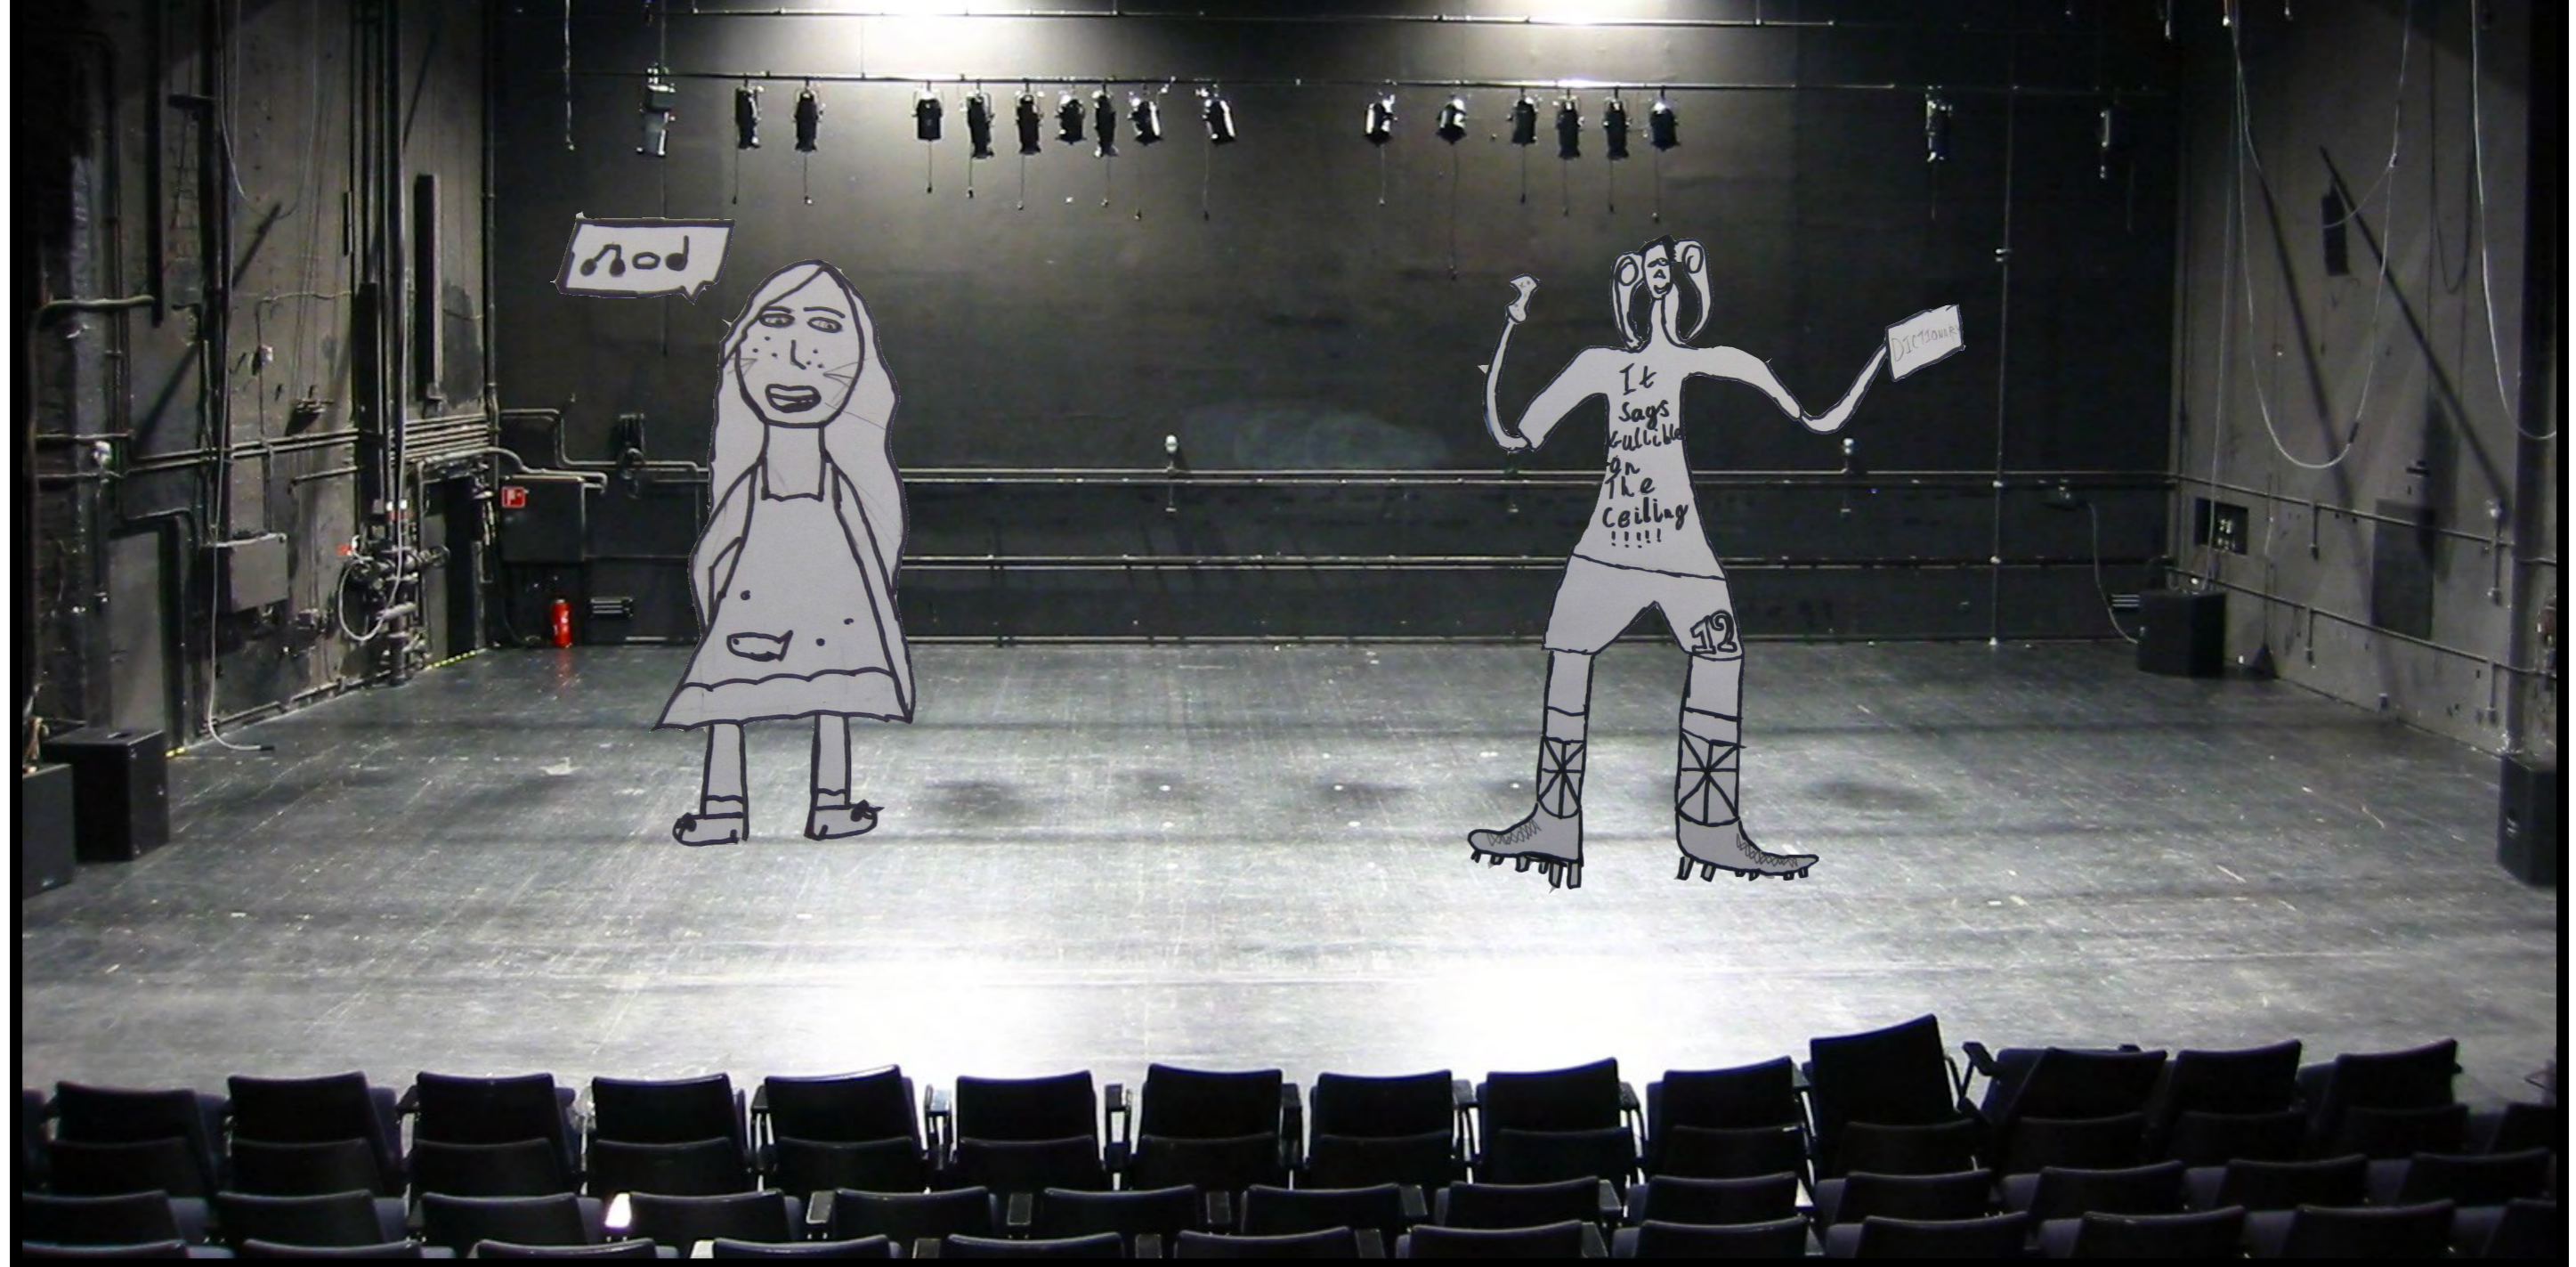

Calum met Andrew at the basketball court. Andrew said, "I can't make this shot, my elbows are all over the place and my power is off."

Calum commented, "Just calm down and keep a cool head and you'll get it eventually."

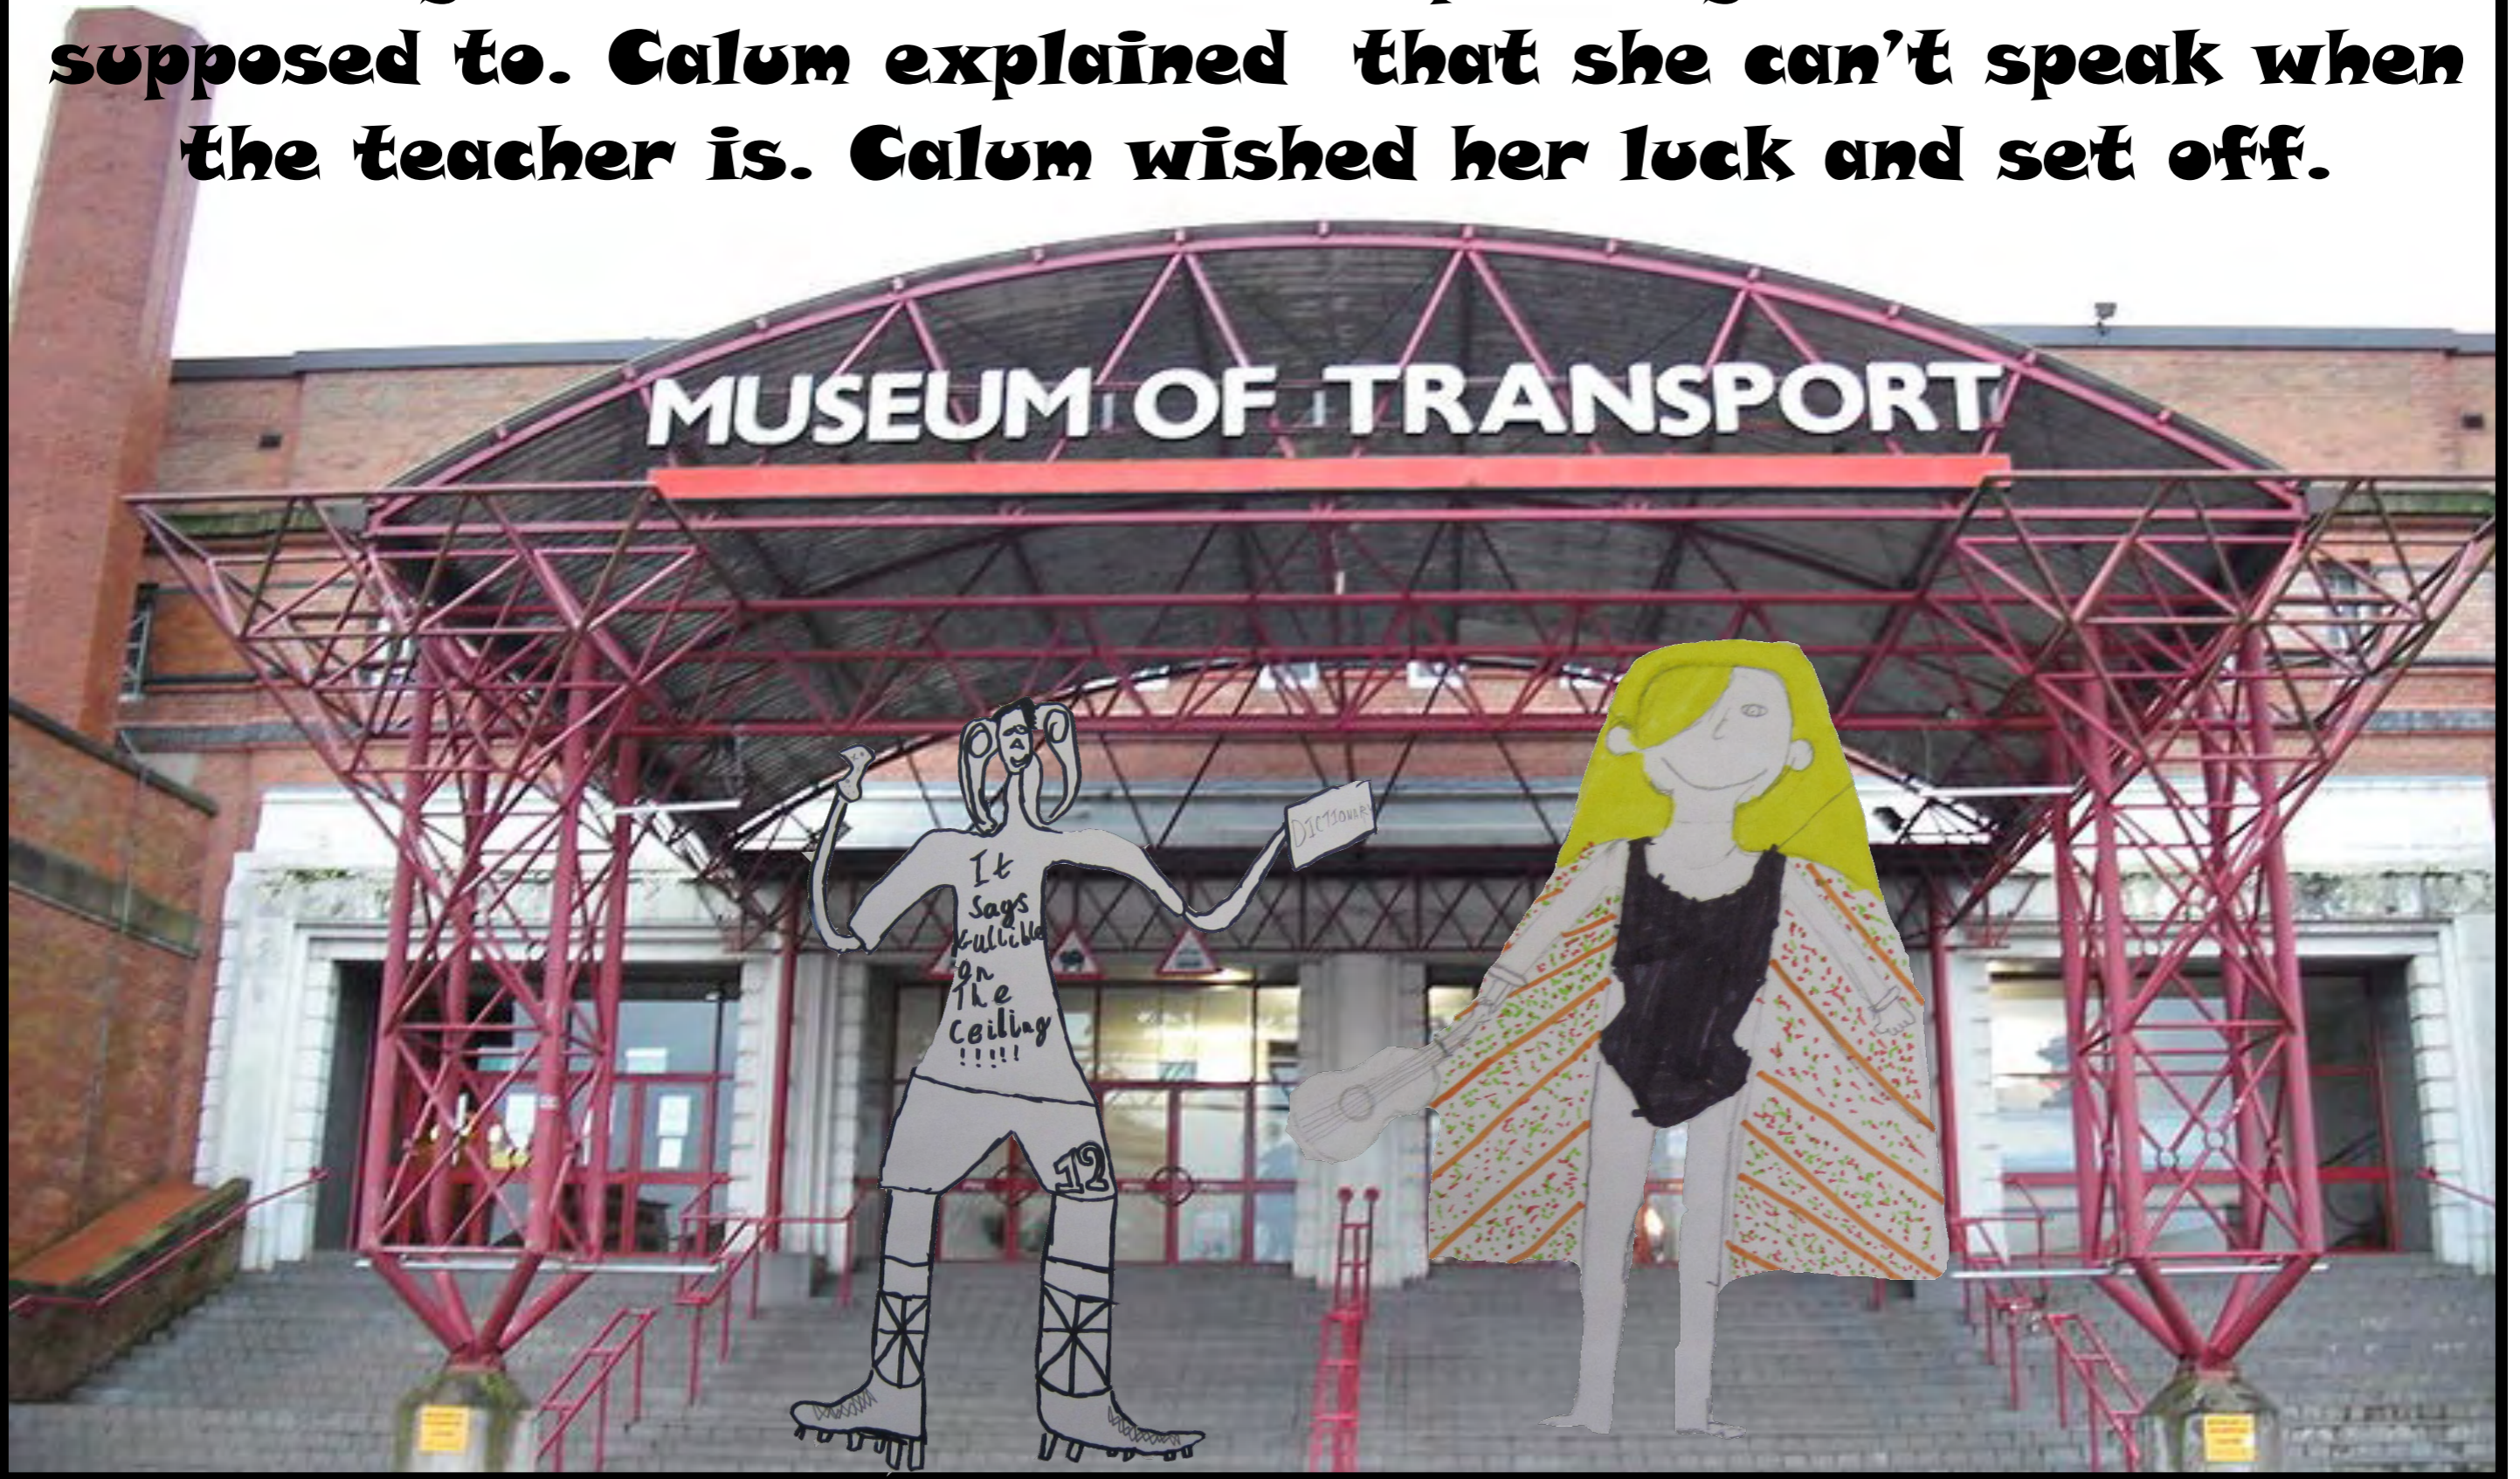

And he did! Calum said farewell and went on his way.

Calum met Lucy at the music stage. She was held back back by her shyness because of her music test and she had to perform. Calum told her some handy tips for her test and bid her farewell.

Zoe was at the Transport Museum looking quite annoyed. She was given into trouble for speaking when she wasn't supposed to. Calum explained that she can't speak when the teacher is. Calum wished her luck and set off.

The next day, the five students met after school to discuss how their day went. They all learned that if you help others then they will help you. Everybody had a perfect day.

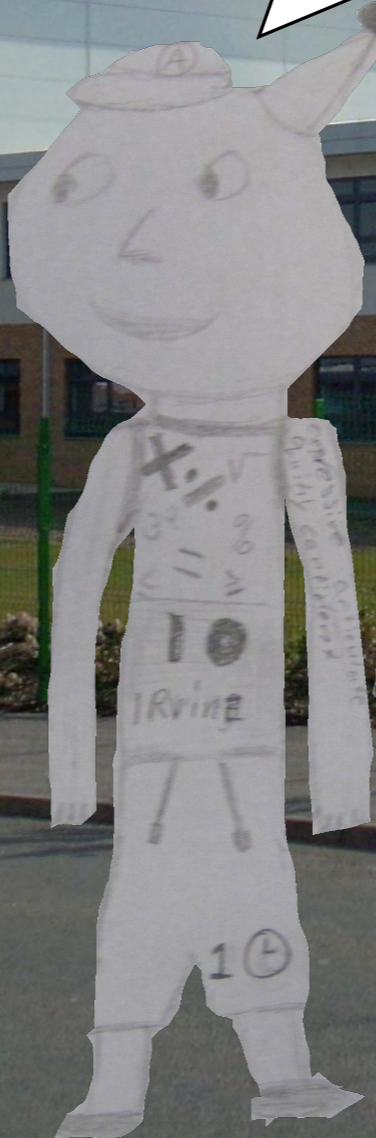

I've learned to ignore bad students.

I've learned to speak out when I need to.

I've learned that frustration means that you lose what you're doing but don't let it take over you.

I've learned to speak out when I have the chance.

I've learned to be quiet when I'm in class and when somebody else is speaking.
